The image shows the control panel of an OWON power supply on the left and its corresponding software interface on the right. The control panel has three buttons: 'System', 'Memory', and 'Keylock'. It features a central yellow 'OK' button surrounded by four directional arrows (up, down, left, right). The software interface is titled 'OWON' with a red 'OFF' button and a speaker icon. It displays a 'Memory' table with five entries (M1-M5) and an 'Edit' button. Each entry shows 'SET:' and 'O.P.' values. A legend at the bottom defines symbols: Memory (blue square), Exit (white square), Choose Menu (green square), Knob (yellow square), Modify Parameter (orange square), Choose Parameter (purple square), and Confirm (red square).
